

NIA IMPACT
COLLABORATORY
TRANSFORMING DEMENTIA CARE

Grand Rounds

The National Institute on Aging (NIA) Imbedded Pragmatic Alzheimer's Disease (AD) and AD-related dementias (ADRD) Clinical Trials (IMPACT) Collaboratory works to build the nation's capacity to conduct pragmatic clinical trials (ePCTs) of interventions embedded within health care systems for people living with dementia and their care partners. The IMPACT Collaboratory hosts free webinars on the 3rd Thursday of each month at 12 noon ET addressing these issues. If you are not yet on our mailing list, [join here](#) to receive IMPACT updates and reminders. Registration is not required, and a recording of the webinar as well as a companion podcast will be available after the event on our website, impactcollaboratory.org.

“Electronic Nudges and Pragmatic Trials to Improve Hospital Palliative Care Delivery”

Katherine Courtright, MD, MSHP

Assistant Professor of Medicine, Palliative and Advanced Illness Research (PAIR) Center, Perelman School of Medicine, University of Pennsylvania

Thursday, October 19, 2023

12:00 – 1:00 pm ET

Katherine (Kate) Courtright, MD, MSHP is an assistant professor of medicine and a core faculty member at the Palliative and Advanced Illness Research (PAIR) Center at the Perelman School of Medicine at the University of Pennsylvania. Dr. Courtright's research aims to improve the effectiveness, efficiency, and equity of palliative care delivery for people living with serious illnesses. Her research combines insights from the fields of predictive, behavioral, and implementation sciences to develop and test novel interventions in large, embedded, pragmatic trials that systematically promote timely primary and specialist palliative care for patients most likely to benefit. By leveraging hybrid pragmatic trial designs, Dr. Courtright's work further elucidates key implementation contextual factors at multiple levels within a health care system to facilitate interpretation and dissemination of trial findings. Dr. Courtright graduated from Temple University School of Medicine, completed her internal medicine residency and a chief residency at the University of Pennsylvania. She remained at Penn for fellowship training in pulmonary and critical care hospice and palliative medicine, and earned a master's degree in health policy research. Dr. Courtright joined the Penn Medicine faculty in 2016, attends in the medical ICU and on the inpatient palliative care consult team, and serves as the Director of Research for Penn Medicine Palliative Care.
