

NIA IMPACT
COLLABORATORY
TRANSFORMING DEMENTIA CARE

Grand Rounds

The National Institute on Aging (NIA) Imbedded Pragmatic Alzheimer's Disease (AD) and AD-related dementias (ADRD) Clinical Trials (IMPACT) Collaboratory works to build the nation's capacity to conduct pragmatic clinical trials (ePCTs) of interventions embedded within health care systems for people living with dementia and their care partners. The IMPACT Collaboratory hosts free webinars on the 3rd Thursday of each month at 12 noon ET addressing these issues. If you are not yet on our mailing list, [join here](#) to receive IMPACT updates and reminders. Registration is not required, and a recording of the webinar as well as a companion podcast will be available after the event on our website, impactcollaboratory.org.

“Outcomes truncated by death in randomized trials”

Michael Harhay, PhD, MPH

*Assistant Professor of Epidemiology and Medicine (Pulmonary and Critical Care)
University of Pennsylvania*

Thursday, November 16, 2023

12:00 – 1:00 pm ET

Michael Harhay, PhD, MPH, leads a research program that develops statistical methods, study designs, and outcome measures to improve studies for patients with critical and severe illnesses. As director of the NIH and PCORI-funded Clinical Trials Methods and Outcomes Lab at the University of Pennsylvania's Palliative and Advanced Illness Research Center, his team is particularly focused on developing and using causal inference and Bayesian statistical methods to better design and analyze pragmatic and cluster-randomized trials for these patient populations. He has contributed to a wide range of trial methodology areas, including informatively missing or truncated data, estimand refinement, Bayesian trial applications, small-sample corrections, and making the best use of baseline covariate information. In 2022, he joined the Penn Medicine Nudge Unit as the Director of Statistical Evaluation, where he applies these methods to studies in Penn's health system. Dr. Harhay currently serves as a deputy editor of the American Journal of Respiratory and Critical Care Medicine and an associate editor of the International Journal of Epidemiology. In 2023, he was named an Honorary Research Fellow in the MRC Clinical Trials Unit at University College London.
